All-In-One Rewinder and Unwinder for PRIMERA® LX800/810 Series

Model ASD1131-S1-P

All-In-One Rewinder and Unwinder has been specifically designed for Primera LX800/810 Series. The Model ASD1131-S1-P can handle labels up to 210 mm wide, it can rewind rolls of labels with diameter up to 250 mm, it has a speed of 120 rpm and it has an adjustable core holder from 46 mm up to 118 mm. It also has the second optional support for heavy rolls. The machine has an external power supply of 220/18 Vac and an electronic circuit controls all the functions. The plate of the machine was designed so that the printer can be laid on it in order to guarantee correct stability and alignment. This allows the printer to avoid any possible overturn or interference.

The tension arm position, with reference to the printer's state, is calibrated as it follows:

- When it is in the central position, the device is idle
- When it is down, the device rewinds the labels
- When it is up, the device unwinds the labels

The obtained roll will have the labels face out only. When the roll of labels runs out, the device stops thanks to the contact between the tension arm and the plate. An acoustic signal sounds to let you know the roll is finished.
